

# Covid-19 Vaccine: Facts & Benefits

The current vaccines authorized in the U.S. for use against Covid-19 are Moderna and Pfizer. Both require two doses to be effective. It is currently being released to the public in phases. If you are unsure whether receiving the vaccine is the right decision for you, ask your physician prior to scheduling.

## Benefits of receiving the Covid-19 vaccine:

- The vaccine is 95% effective in protecting you from Covid-19.
- Getting vaccinated may also protect people around you.
- Vaccines help your immune system better fight the virus if you do become exposed.
- Stopping a pandemic requires using all tools available to prevent the spread including masks, distancing, and vaccines.
